

Lesson 5A – Update Penpower Jr. Software

Update Global Penpower Jr. Software:

1. Go to the Penpower website by clicking on the following link:
http://www.penpower.net/usa_chinese/5_0service/5_1_2_04download.html
2. Click on 軟體下載. In the Security Warning Box, choose **Save**.
3. Choose Desktop as the save as location. Then, click **Save** button.
4. The software size is 230MB even though it says 94MB which is not correct. It takes more than 3 minutes to download. After you finish the download, you should be able to see a GlobalPPJr icon on the desktop.
5. Before you install the upgraded version software, you need to uninstall the original software first. This rule does not apply to all the software. Some software can automatically replace the old one after the new one is installed. Internet Explorer is good example. Some software does not affect the old one. Both new and old are treated as different software. TeamViewer is a good example.
6. To uninstall the old PenPower software:
7. Click on **Start**. Click on **Control Panel**.
8. Double click on **Add or Remove Programs**.
9. Click on **Global Penpower JR**.
10. Click on **Remove**.
11. Confirm uninstall by click on **OK**.
12. To install the updated PenPower software:
13. Double click on GlobalPPJr icon. Click on **Run** in the Security Warning box.
14. The WinRAR self-extracting archive box will appear. Click on the radio button **Install**.
15. User Account Control Window pops up. Click on **Yes**.
16. Click on **Global Penpower Jr**.
17. Choose **English**. Click on **OK**.

Lesson 5A – Update Penpower Jr. Software

18. A window Welcome to Global Penpower JR Program Setup shows up. Click on **Next>**.
19. Use the default installation folder. Click on **Next>**.
20. For Setup Type, choose **Typical** which is also default. Click on **Next>**.
21. Choose **New pen/mouse** mode which is recommended. Click on **Next>**.
22. For Existing Folders, use default which is Accessories. Click on **Next>**.
23. Make sure **Traditional Chinese** is checked. Click on **Next>**.
24. Wait for software installation.
25. **Uncheck** Automatically load Penpower JR. Click on **Next>**.
26. Click on **Register later**.
27. Choose default setting: Yes, I want to restart my computer. Click on **Finish** to restart computer.

28. Set up a shortcut for **Penpower Input Tool** which allows you to input Chinese characters by using 拼音.
29. Click on Penpower JR. shortcut to run this program.
30. Click on Menu icon. Click on **Setting**. Click on **Writing** tag.
31. Click on the arrowhead at **Speed** and Choose speed 9 so that you do not need to write very fast.
32. Click on Recognition tag and check the mode you like. Click **OK** to quit setting.
33. Go to desktop. Right click on the **GlobsIPPJr_v7.1e2** icon. Click on **delete**.
34. Are you sure you want to remove this file to the Recycle Bin? Click on **Yes** unless you really intend to use it again in near future.
