Computer Lesson 16_Use USB Flash Memory to Transfer Files

Copy a file in computer to USB Flash Memory:

1. Inset USB flash memory stick into one of the USB sockets. Waite for a few seconds, the AutoPlay window appears.

2. Choose **Open folder to view files** by clicking on it. You will see the folders and files stored in this memory. Keep this window open.

6. You will see the copy in progress. Then the file has been copied to USB flash memory.

Copy a file in USB Flash Memory to computer:

1. Inset USB flash memory stick into one of the USB sockets. Waite for a few seconds, the AutoPlay window appears.

2. Choose **Open folder to view files** by clicking on it. You will see the folders and files stored in this memory. Find the file you intend to copy from the USB flash memory to computer. Right click on this file then click on **Copy**. Keep this window open.

- 3. Choose the location you intend to keep this file on your computer. In this lesson, let us use <u>Desktop</u>. Right click at the blank area of desk top. Then choose **Paste**.
- You will see the copy in progress. After the process is over, you will see this file on <u>Desktop</u>.
- 5. This file will be used in later class. Keep it for the time being.
- 6. This process can be done to any other computer so that you can transfer files among computers by using USB Flash Memory as the media.
